data governance
as a service

DGaaS

dataXchange

challenges?
how DGaaS can add value to your organisation

many organisations are struggling to find the right mix of skills to solve their data governance challenges, be that an existing function or new.

in response, we have created a catch all data governance offering that allows you to select services based on your own needs and priorities, consumed via a managed service.

DGaaS is intended to help solve the following challenges:

- ability to leverage SME resource without commitment to full FTE's
- breath in/out scalability for programme and/or BAU
- skills shortage in the NZ market.

this "as-a-service" offering provides you with a service catalogue, allowing you to choose from a range of data governance capabilities, to help you deliver against your requirements.

dataXchange is a specialist data governance services business who will partner and work collaboratively with you to help deliver your data governance journey.

DGaaS empowering organisations to thrive in the modern data economy

our specialist service catalogue covers all aspects of data governance, partnering to help you manage and scale more effectively

data done differently

there are a number of key challenges when implementing a successful data governance programme

whether you have an existing Data Governance function, or need to create capability from scratch

1 leveraging SME resource

dataXchange can work with your data governance team, to perform specific tasks based on our expertise or provide you with advisory services on an ongoing basis. this could consist of strategic review and recommendations, applying thought leadership and/or extra hands for your activities and tasks.
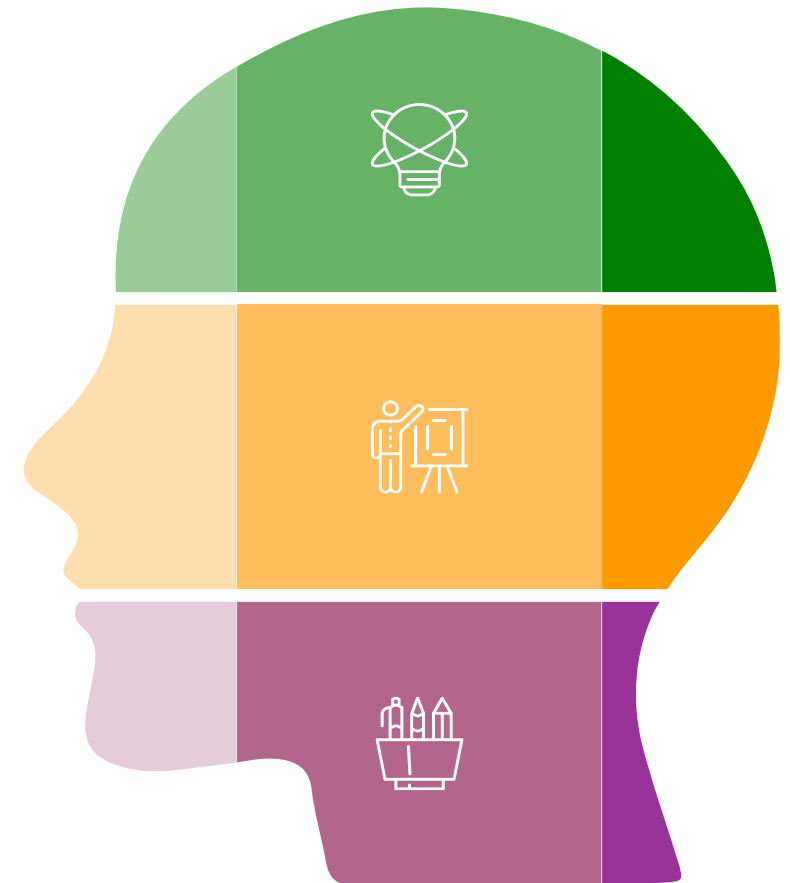

2 breathe in/breathe out scalability

our DGaaS solution offers experienced personnel to assist you in scaling up your efforts as needed, and for the time period required. this enables you to scale up to tackle critical tasks without the concern of incurring substantial, enduring overhead costs associated with not being able to scale down.

3 skills shortage in the NZ market

if you are struggling to find the right mix of skills and experience in the market to cover the multifaceted application of data governance, DGaaS can help. we know that good DG people are hard to find (we've hired a number of them). dataXchange can help solve your data governance skill shortage gaps.

our as-a-Service offering for Data Governance can provide the right capabilities, at the right time. DG has never been so easy.
